

Mapping Fresh Grade Description:

Students have been engaged in place-based outdoor learning as they explored cardinal directions through marking locations on maps of the school campus during directional scavenger hunts. They also took a nature walk in the local trails to brainstorm items that they would later put on their legends. Their efforts cumulated in a map of the trails with a compass rose and a legend.

Measurement Fresh Grade Description:

Students have been measuring, describing, and comparing objects both indoors and outdoors with a variety of tools, including rulers, measuring tapes, and unifix-cubes, as well as using units such as centimetres and “blocks/cubes”. They also were introduced to the concept of perimeter and applied their measurement skills to help solve this new type of problem.
